

# Positive Word "Fortune Teller"

Encourage your friends and family with this fun paper craft game!

Adults, look on the next page for instructions!

# Positive Word "Fortune Teller"

## Here's an idea!

If you don't have a printer you can make the template on your own by starting with a square piece of paper! Do the folding first, then fill in the spaces.

## Making the Fortune Teller

- Print out the template on the next page and cut out the black square.
- Write color names on the four empty squares in the corners.
- Flip the square over and fold the corners into the middle so that they touch. The folds will be on the dotted lines.
- Flip it over again. Write a positive word in each triangle.
- Fold the corners into the middle so that they touch.
- Fold this square in half one way, then open it, and fold it in half the other way, keeping the numbers on the inside each time.
- Put your fingers under the color flaps and pinch the two sides together to make a square with the four color flaps on top.

## Playing the Game

- Holding the fortune teller, ask someone to pick a color.
- Spell the color, opening the fortune teller back and forth with each letter.
- Ask them to pick a number, then open the fortune teller back and forth as you count to that number.
- Repeat the number step again.
- This time, when they pick a number, open that number to reveal a positive word.
- Tell the person of a time when you saw them live out that positive word.
- Now take turns so that you can pick a word!
