

Positive Word Cube

Making the Cube

- Print out the template and fill in each square with a positive word.
- Cut out the template along the outside lines.
- Fold the cube and tuck the flaps inside, taping the edges together.

Here's an idea!

If you don't have a printer, use any dice from a board game you have, and decide on a word for each number, 1-6 or 2-12, depending on whether you choose to use one die or two.

Playing the Game

- Roll the cube like you would roll dice and read the word that it lands on.
- Then, anyone playing the game can tell you a time when they saw you do something to live out that word.

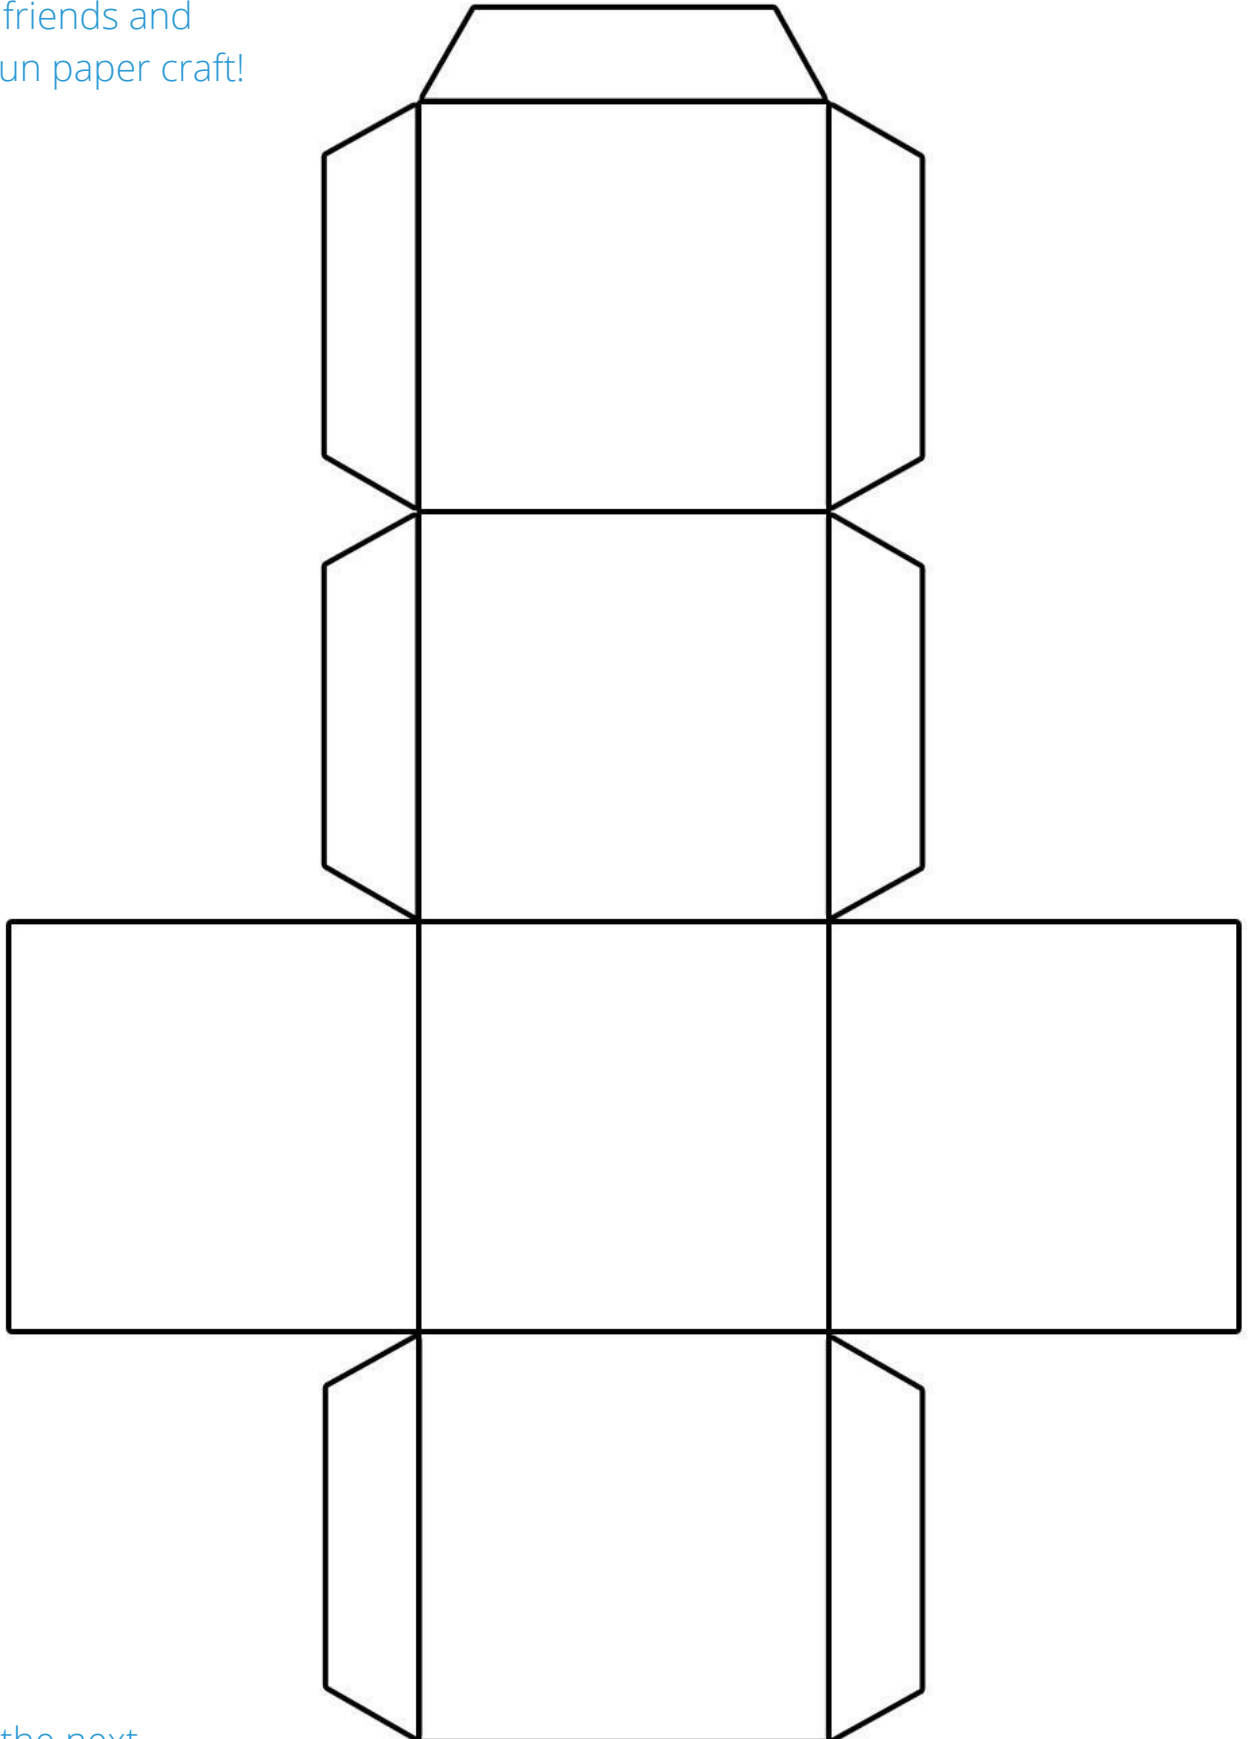

Need a Challenge?

Use the word cube instead of using a six-sided die in your next board game. When you roll a word, move forward 1 space for each letter in the word. You can spell the word out instead of counting as you move across the board.

Positive Word Cube

Encourage your friends and family with this fun paper craft!

Adults, look on the next page for instructions!
